

NATURALLY PRODUCED VERIFICATION

This verification needs to be from the original source or manufacturer of the inputs.

For MOSA Client _____

Varieties or brand name(s) of product(s)

Description of the processing process for each product listed above

-Is the natural substance chemically or structurally changed in the manufacturing process? Yes No

-Is the chemical change from heating or burning? Yes No

A substance that has undergone a chemical change through a naturally occurring process (composting, fermentation, or enzymatic digestion), is heated, or where biological matter is burned, produces a natural substance. A chemical change caused by any other means, produces a synthetic substance.

I affirm that the above product(s) were not processed with synthetic substances or additives, and are naturally derived products.
