

NATURALLY PRODUCED VERIFICATION

This verification needs to be completed and signed by the *original* manufacturer or producer of the input. Any subsequent processing *by a different entity* will require a separate verification form to be completed by that processor.

Varieties or brand name(s) of product(s):

Description of the processing process for each product listed above:

Is the natural substance chemically or structurally changed in the manufacturing process? Yes No

Is the chemical change from heating or burning? Yes No

A substance that has undergone a chemical change through a naturally occurring biological process (composting, fermentation, or enzymatic digestion), physical methods such as steam hydrolysis, or where biological matter is heated or burned, produces a natural substance. A chemical change caused by any other means produces a synthetic substance.

I affirm that the above product(s) were not processed with synthetic substances or additives, and are naturally derived and processed products.

I have completed this form for **MOSA client:** _____
(MOSA client name)

Name (please print) _____ Position _____

Company and/or Farm name _____

Address _____

City _____ State _____ Zip _____

Phone _____ Email _____

Signature _____ Date _____
