

ORGANIC SEARCH

Nonorganic seed or planting stock may only be used if an equivalent organically produced variety is not commercially available in the appropriate form, quality, or quantity necessary to fulfill the needs of the operation. A minimum of three sources *that carry organic seed or planting stock* must be consulted before nonorganic seed or planting stock may be purchased. Use this form to document your attempts to source organic varieties and provide an explanation for sourcing nonorganic varieties. Note that if an organic search is performed by your seed dealer, or if specific varieties are requested by your buyer, you are responsible for ensuring that the search meets these requirements. Alternatively, if you source your seed or planting stock from catalogs, you may have the catalogs (at least three companies that carry organic seed or planting stock) available at your inspection. For guidance and clarification on equivalent variety considerations for form, quality, or quantity criteria, see [NOP 5029 Guidance Seeds, Annual Seedlings, and Planting Stock in Organic Crop Production](#).

Crop Type & Variety	Source / Supplier	Date Contacted	Describe why nonorganic seed or planting stock was purchased			
			Organic unavailable in the appropriate form	Organic unavailable in appropriate quality	Organic unavailable in appropriate quantity	Organic unavailable in the preferred variety (list specific characteristics)
