## STORAGE INVENTORY FORM

Use this form to track product in and out of a single storage unit/location, or to track one crop that is under the same management but stored in multiple storage areas. For split production operations, indicate whether crops are organic or nonorganic. All storage units must be listed in the storage unit section of your OSP.
Livestock producers can use this form to keep track of feed purchases and harvests as well as feed fed out of storage. Use this form to document feed inventory.
